

# SUBMISSION GUIDELINES

## FINE ART

For fine art, presentation, or photographic reproductions please provide us with PDFs, TIFs, or original art.

When submitting digital files, please follow these steps:

- **Convert your document to CMYK color mode.**

Our printers are based on the CMYK color gamut. Viewing your work in CMYK mode will give you a more accurate impression of how the colors will appear when printed.

- **Verify that your file has a resolution of 300 ppi to ensure a high quality print.** If there are any embedded images or graphic files within a document, confirm that they have also been saved at a resolution of 300 ppi.

- **Verify that your file is set up at Print Size.**

For example, if you would like a 24 x 36" print, check that these are the dimensions of your document.

- **Flatten your document.**

This applies if you are using Adobe Photoshop.

- **If you'd like a border around your print, ensure the border has been set up in your final file.**

- **Export this as a high-resolution PDF file.**

If possible, avoid using compression.
